

KING HIT XG1060

World's Fastest and the Only HDD Duplicator with Data-Only Copy for Any File System

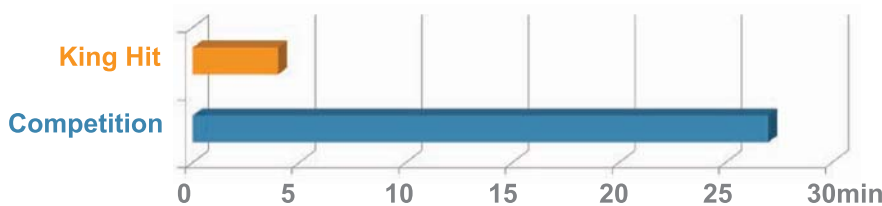

The King Hit (XG1060) is the world's leading hard drive duplicator for high volume industrial applications. It includes a number of features for industrial duplication that are unmatched in the industry, including Data-Only Copy for any file system type.*

Features

- 1 **SATA/ATA** (Any Brand, Any Model)**
SATA I/II: 3.5" - 2.5" ATA/IDE: 3.5" - 2.5" - 1.8" - 1.0" - 0.85"
- 2 **Support SATA 3.0Gbps/ATA*****
18 GB/min transfer rate. Fastest speed in industry guaranteed.
- 3 **Multi-Unit Networking**
Up to 10 units for 1-to-59 copy with no speed loss.
- 4 **Secured Data Erase**
DoD, NSA, Low-Level Format, etc.
- 5 **Reporting System (currently in development)**
Automatic Log File creation for data management and certification.
- 6 **Easy LCD Status Display**
Stand-alone or PC controlled operation. Easy user interface.

Reduce Time & Costs

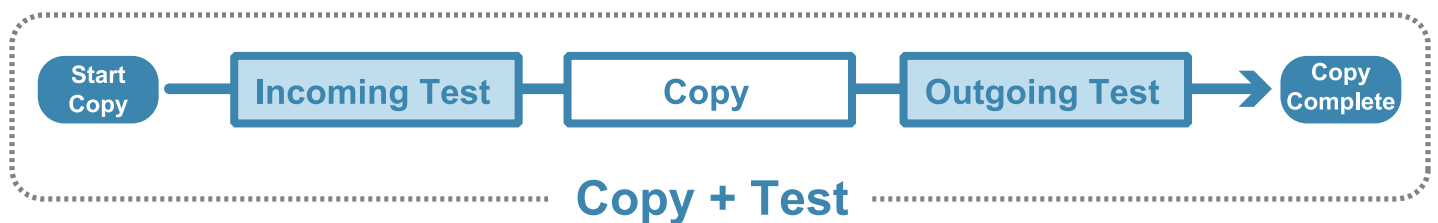

Automatically marks used disk space. Copies at 3.4 sec/GB (~18 GB/min)*** for used space and 1-2 sec/GB for free space.

Example uses 120GB SATA II HDD: 10GB data area on Linux OS.

Improve Quality

Test Every Copied Hard Drive for Quality Assurance

Automatically performs HDD incoming and outgoing inspection during duplication to ensure integrity of duplicated disks.

*Competitors limited to FAT and NTFS file systems for data-only copy. ** With optional SATA to ATA adapter. *** For qualifying high-speed HDD.

KING HIT XG1060

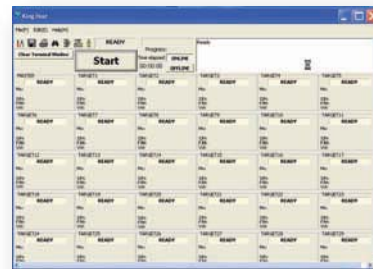

#1 in Cost Reduction and Lifetime Ownership Value

Host Software and Reporting System (standard with purchase)

YEC Host Software allows the user to remotely manage every HDD port while automatically generating Log Files for each copied HDD.

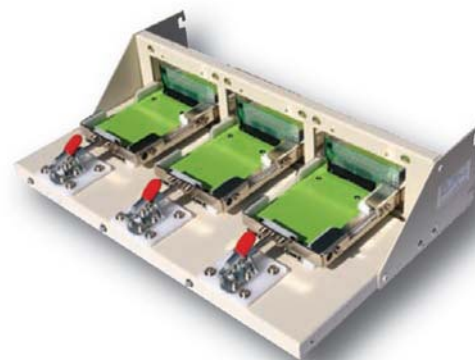

(Feature currently in development.)

Auto Loaders (optional)

Advantages for Industrial Users

- Fast: Connect & disconnect HDD within seconds
- Alleviate wear on connector pins
- Maintain a neat and efficient work environment
- Available for ATA 3.5" - 2.5" - 1.8", SATA 3.5" - 2.5" - 1.8"

Networking

For High Output Applications

- 1:59 max duplication
- Network up to 10 units at once (no speed loss)
- Ideal for heavy industrial applications
- No speed loss during data transfer
- Adjustable output for flexibility

* Optional Link Cable is required

Specifications

HDD Interface	ATA* (EIDE), SATA *With optional SATA to ATA adapter
Connectable Disks	1:5 or link up to 10 units for 1:59
Input Power	AC90-240V \pm 20 50/60Hz
Dimensions	W380 x D270 x H130 (mm)
Weight	8.5 lbs. (3.9kg)

*Specifications subject to change without notice.
